

Have you or your child been diagnosed with an Eosinophilic GI Disease (EGID)?

- Eosinophilic Esophagitis (EoE)
- Eosinophilic Gastritis (EG)
- Eosinophilic Gastroenteritis (EGE)
- Eosinophilic Colitis (EC)

*If so, you are invited to become a Partner!*

The goal of EGID Partners is to advance the research of EoE, EG, EGE, and EC. EGID Partners is more than just a one-time registry or a way to learn about new research opportunities. EGID Partners provides a way for an online group of patients diagnosed with one or more EGIDs to contribute to clinical research through surveys and become “citizen scientists”. Individuals without EGIDs are also encouraged to contribute to EGID Partners so comparisons may be made between those who do and don’t have these conditions.

*To find out more about EGID Partners or to join, scan the QR code or go to:*
